COMPILER'S PREFACE

1830 & 1840 CENSUS AND INDEX TO WILLIAMS COUNTY

A note to researchers:

Researchers of this listing should be aware of the many variant spellings, which may be found within. The census taker was not consistent in his letter formations, making some of them indistinguishable from one another. Many consonants (such as m, n, r) and the vowel u appeared to be the same. Please search the entire index as the name you are researching for could be listed under a completely different spelling.

In some cases the name was written clearly but was known by the compiler to be spelled phonetically rather than its actual spelling. The name was indexed according to the spelling shown on the census.

Also regarding the difference in technologies utilized in the preparation of this publication, the reader will find the following information: the township and page number of the census data, the surname and given name of the head of household, and the number of adults and/or children in each category in which there was an entry. In all cases the reader is urged to check the census for other bits of information not found here.
